20x50 Binoculars

Magnification	20X	Objective	50mm	Eye Pupil Diameter	5mm
Prisms	BAK4	Prism Size	22.5mm	Eye Relief	12mm

Usage:

You can choose the perfect boost in power for sporting events, sightseeing, birding, wildlife watching, and more! You will enjoy great views of distant subjects with the 50mm aperture bringing in greater detail and image clarity—perfect for when viewing conditions are dim. No matter how you choose to observe, this binocular is a solid performer.

Features:

- FMC Multi Green Coated: Multi-coated optics increase light transmission for brighter, sharper images with high contrast
- Metal Frame：Its tough, rigid frame is coated with rubber to stand up to hard use in the field.
- The 23mm large eyepiece makes the eyes more confortable, but also makes the field of view wider.
- High quality magnification,clear and bright view.
